

MMHCC Newsletter May 2004

MouseLine

Thanks to the many people who stopped by the NCI Mouse Models of Human Cancers Consortium booth at the recent AACR and Experimental Biology meetings. We enjoyed meeting you and talking about how the 78 mouse models distributed by the NCI Repository (<http://mouse.ncicrf.gov/>) might be useful in your research. Remember these mice are offered to the scientific community at no charge.

We hope you find this monthly newsletter of interest; please feel free to submit notices of meetings or other pieces of information for inclusion in future issues.
